# RUNNER MATS

## 2015

At work or at home, IC Urethane Products offers a variety of anti-fatigue mats suitable for any work station. Whether you are a Chiropractor, a Bank Teller, a Stylist, a Machinest or a Homemaker standing in front of your kitchen sink, we have a Runner Mat to suit your needs. Feel the difference with a Unique Mat® available in many different sizes and three stylish colours.

IC Urethane Products Inc. ensures that the environmental impact of our production is kept to a minimum. We use no VOCs or PVC in our process or end products. Manufacturing does not release harmful gases associated with vinyl materials and other rubber products.

Plant generated waste is reclaimed and turned into new products. Our 100% polyurethane mats can be easily recycled at the end of their life cycle, greatly reducing the amount of waste going to landfills.

Our Research and Development team continues to develop initiatives to further reduce waste and strives to find the right balance between manufacturing practices and being an eco-friendly company.

We believe that high efficiency and quality create both value and sustainability of the planet's resources. By producing a quality product that can be used and reused for so many purposes and one that will withstand the test of time, we are reducing the amount of waste for future generations.

IC Urethane Products is a world leader in polyurethane technology and design. We are proud to offer you a product manufactured in Canada.

We have set the bar by which all others are measured.

The demands of today's busy world often take a toll on a person's body. Unique Mats® not only reduce fatigue and discomfort associated with long-term standing, but our ergonomic design interacts with the body to reduce stress and strain while promoting better posture, proper circulation and a sense of well-being.

Aches and pains related to static standing are greatly reduced with the use of anti-fatigue mats which in turn increases productivity and reduces absenteeism in the workplace. Don't just take our word for it ... CCOHS (Canadian Centre for Occupational Health and Safety) and OSHA (Occupational Safety and Health Administration - US) both recommend the use of anti-fatigue mats in work areas.

Unlike most mats on the market, we have engineered the Unique Mat® line via the combination of a durable urethane top membrane and 5/8" thick urethane foam. The chemicals used in the processing plant are custom blended to our specifications in order to create the best possible result: a mat that acts as a shock absorber, reacting to the slightest shift of your body. All of our products are molded, thus creating a uniform mat with a consistent bevel along all edges and a flush fit with the floor to reduce tripping hazards. For two decades we have manufactured mats with safety foremost in our design, without compromising comfort.

**BLACK**

**CHARCOAL**

**ESPRESSO**

The lightweight design is available in three attractive colours and many different sizes ranging from 1.5' x 2.5' to 8' x 4'.

Backed by a five-year written Warranty, Unique Mats® are the best choice.
